

Assignment 1: Opinion Network Formation

The dataset from our recent survey collecting opinions on Technology, Education, Ethics, and Environment is available here: [link](#)

Your task as a team is to use this dataset to construct and analyze a network based on these responses and finally submit a report.

General Guidelines

- This is an open-ended assignment, giving you the freedom to choose your approach to forming and analyzing the network.
 - The use of AI tools is permitted.
 - You must clearly detail the contribution of each team member, as the assignment will be graded individually.
-

Report Requirements

Your final submission must be a report (PDF format) of approximately 8 pages. It must include the following sections in this order:

- **Team Name:** The name of your group.
 - **GitHub link to your code:** Ensure the repository is accessible and well-organized.
 - **Dataset Documentation:** Explain how you interpreted and prepared the survey data.
 - **Pipeline Followed:** Describe the network and the step-by-step process you used to construct this network from the data.
 - **Analysis and Visualizations:** Provide graphical representations of your network and outline the key metrics.
 - **Results and Discussion:** Explain your findings and what the network reveals about the class opinions.
 - **Individual Contribution:** A clear breakdown of the specific tasks completed by each group member.
